0141 445 5721	Product Specifications
Feed Stuff	Maize/ Corn Kernels
	Maize
	Image- Typical Image of Maize *
	**(product may vary in appearance depending on suppliers)
Product Description	Maize is mechanically harvested during which the maize kernel is removed. This process separates out the husk and the cob, keeping only the kernels. Grains, Cereals- Grains of Zea mays L. Ssp. mays. It may be rumen protected.
Specification*	Dry Matter: ~85%*
opeenication	 Moisture: ~14%*
	• Oil: ~3.0-3.7% *
	• Fibre ~2.4-6.0%*
	(Purchased through approved suppliers. Adventitious mix GMO content <0.9%)*
	(*Values are not contractual)
General Use	Maize has a high starch value and is used to feed a variety of animals. Maize is a good source of slow
	release easily digestible starch.
Packaging &	Bulk
Transport	
Labelling	According to EU legislation 767/2009
Storage	Maize should be stored at an ambient -cool temperature in dry flat stores. No heat should be applied
Ŭ	to the products as it has potential to self-ignite given combustible conditions.
	to the products as it has potential to sen ignite given compastible conditions.
Legal Demands	The products comply with legal requirements & legislation. The most significant elements of which

R7-04A	Product data Sheet Animal Feeds A BayWa Company	
Inhalation	When handled, maize meal can give off dust. Prolonged inhalation of excessive amounts of nuisance	
	dusts may effect respiratory system. Prolonged or repeated exposure may result in lung damage.	
Ingestion	No known hazards.	
Eye Contact	Contact can cause irritation.	
Skin Contact	Dust can cause irritation or sensitivity to skin.	
Toxicological	Non-toxic product	
Information		
Occupational	None available	
exposure limits		
Emergency first aid procedures		
Ingestion	Non-toxic – dust masks should be worn.	
Eye Contact	In the event of eye contact irrigate with water for at least 15 minutes. Exposure may result in mild	
	irritation. Seek medical attention if irritation Occurs.	
Skin Contact	Wash effected area with soap and water. Seek medical attention if irritation develops.	
Inhalation	Remove person to fresh air. Seek medical attention if symptoms develop.	
Physical state Solid		
Physical state	Yellow/Orange whole grain, may be ground, flaked, rolled or pelleted.	
Appearance Odour		
	Maize has a slight, pleasant odour. Excessively moist maize has a sour odour. Not known	
Flammability limits		
Fire & Explosion hazard Flash point >60°C		
Flammability	Due to its oil content, Maize, especially freshly harvested maize, has a strong tendency to become	
Hammability	rancid and undergo self-heating. If the temperatures measured at the cargo rise to > 40°C, action	
	must immediately be taken to reduce the temperature. If the temperatures exceed 60°C, an increased	
	risk of fire must be assumed and appropriate action taken. Damage caused by self-heating results in	
	considerable depreciation	
Extinguishing media	Foam or carbon dioxide	
Explosibility	ST1	
	Special firefighting procedures & precautions	
Combustible when subjected to heat. Suitable extinguishing agents are dry agent, carbon dioxide and foam. Fire fighters		
should use self-contained breathing apparatus to avoid exposure to smoke and fumes.		
Adequate extraction	facilities should be provided in all areas subject to dust.	
	Reactivity	
Stability	Stable	
Hazardous	Will not occur	
Polymerization		
Material to avoid	Moisture- Care should be taken to ensure that the surfaces are not cooled too much, to avoid the	
· · ·	formation of damp boundary layers beneath the cargo surface	
Hazardous	Combustion produces CO ² , CO & thick smoke	
decomposition		
products	Development events of functional southers	
Bospiratory	Personal protection / Exposure control	
Respiratory Protection	Always ensure the work area has adequate ventilation. In case of dust formation, wear appropriate respiratory protective equipment determined and fitted by an expert.	
	Gloves and overalls should be worn when handling.	
Skin protection Eye Protection	Always wear approved safety glasses when working. Full face protective shields can be worn to avoid	
	contact with face. Wash stations should be provided.	
Footwear	Appropriate footwear as specified by workplace requirements.	
Footwear Appropriate footwear as specified by workplace requirements. Environmental Protection		
Environmental	Avoid excessive dust emissions	
precautions		
Spill or leak	No special precautions. Normal sweeping of small spillages and collection is appropriate. For larger	
precautions	spillages mechanical scooping may be necessary (use only diesel vehicles).	
Waste disposal	Dispose spilled or contaminated material to landfill. Do not release into drains or other measures.
