Product Specifications

Feed Stuff Sunflower Seed meal
Trading Name Sunflower Extractions

Image- Typical Image of Sunflower Extractions **

**(product may vary in appearance depending on suppliers)

Product Description By-product obtained during the processing of screened sunflower seed. By product from to of oil through extraction (with the use of processing aids) from sunflower seeds which may	
of oil through extraction (with the use of processing aids) from sunflower seeds which may	the recovery
of oil through extraction (with the use of processing alus) from sufficients	y have been
(partially) shelled Helianthus annuus L.	
Specification* Protein: ~36-37%	
Oil: ~1.2-1.5%	
Fibre: ~15-17%	
Moisture: ~9-10% (These Values are not con	tractual)
General Use (By)products of oil containing seeds are applied in compound feedstuffs for all animal clas	ses.
Packaging & Bulk - Favorable temperature: 5 - 25°C	
Transport	
Labelling According to EU legislation 767/2009	
Storage Dry cool and dark storage. Product can oxidise in storage	
Legal Demands The products comply with legal requirements & legislation. The most significant elements	of which
are:	
• Regulation 183/2005 on Feed hygiene.	
• Regulation 767/2009 on placing on the market and the use of feed.	
GMP+ Feed safety Assurance Scheme.	
Feeding Stuffs Regulations 2000.	
Undesirable The maximum determined contents for undesirable substances in feedstuff, such as estab	lished in:
• Directive 2002/32/EG on undesirable substances in animal feed;	
GMP+FSA; Appendix 1 (Product standards, including residue standards) recalculate	ated to a
moisture content of 12%;	
Specific analysis and standard tolerances	
Salmonella Absent in 25g	
Appearance Grey / black meal pellets	
Country of origin EU, Ukraine, Argentina, Russian	
Health Information	
Inhalation Classified as a dust nuisance only. Inhalation may aggravate those with pre-existing	ng
conditions.	
Ingestion Non-hazardous food product. May cause an allergic response with sensitive indiv	iduals.

R7-04A Product data Sheet Animal Feeds

K7-U4A	Product data Sneet Animal Feeds A BayWa Company
Eye Contact	Can cause discomfort
Skin Contact	In certain individuals subject to Malady, dermatitis may occur and hence protective gloves
	would be advisable. The material is classified as non-toxic but as dust nuisance only. It is not
	a corrosive.
Toxicological	Not available.
Information	Not available.
	Nieure envelleite
Occupational	None available
exposure limits	
	Emergency first aid procedures
Ingestion	Non-toxic – dust masks should be worn.
Eye Contact	In the event of eye contact irrigate with water for at least 15 minutes. Exposure may result
	in mild irritation. Seek medical attention if symptoms persist.
Skin Contact	Wash contact areas with soap and water. Get medical attention promptly if symptoms
	occur
Inhalation	Remove person to fresh air. Seek medical attention if symptoms persist.
	Physical properties
Physical state	Solid
Appearance	Grey / Black can be meal or pellets
Odour	Slight pleasant odour
Flammability limits	Minimum Ignition temperature 300 - 500° (as per transport information service)
•	Fire & Explosion hazard
Flammability	There is a risk of dust explosion at dust/air ratios of 20 - 2000 g/m ³ . BZ 2- Catches fire briefly and
,	extinguishes rapidly
Flash Point	Volatile gases which have formed in the cargo over the course of self-heating and have a flash point of
	around 60°C have spontaneously ignited.
