

Supplier	
Cefetra Ltd The Lightyear Building Glasgow Airport Business Park Marchburn Drive PA3 2SJ Scotland 0141 445 5721	
Product Specifications	
Feed Stuff	Ground Maize
Trading Name	Ground Maize/ Ground Corn
Image- Typical Image of Ground maize	
	
<p>** (product may vary in appearance depending on suppliers)</p>	
Product Description	Maize is mechanically harvested during which the maize kernel is removed. This process separates out the husk and the cob, keeping only the kernels. The kernels are then ground into a fine meal.
Specification*	<ul style="list-style-type: none"> • Moisture ~14% • Dry Matter ~85% • Crude Protein ~9% • Crude 0.1 ~2-3% • Crude Fibre ~3-6% <p style="text-align: right;">(*Values are not contractual)</p>
General Use	Ground maize has a high starch value and is used to feed a variety of animals. Ground maize is a good source of slow release easily digestible starch.
Packaging & Transport	Bulk
Labelling	According to EU legislation 767/2009
Storage	Maize should be stored at an ambient –cool temperature in dry flat stores. No heat should be applied to the products as it can potentially self-ignite given combustible conditions.
Legal Demands	The product complies with all applicable legislation. The most important elements are: <ul style="list-style-type: none"> • Animal Feed Legislation • Directive 2002/32/EG on undesirable substances in animal feed. • Regulation 396/2005 on maximum residue levels of pesticides in or on food or feed • Regulation (EC) No. 1831/2003 concerning animal feed hygiene • Commission Recommendation- EC 2006/576/EC • Where applicable The Animal Feed (Amendment) (EU Exit) Regulations Statutory Instruments (Scotland, England, Wales and Northern Ireland) • Where applicable The Feed (Sampling and Analysis and Specified Undesirable substances) Regulations 2010. (SI for Scotland 354, Northern Ireland 323, Wales 2287 & England 2280)
Undesirable substances	The maximum determined contents for undesirable substances in feedstuff, such as established in: <ul style="list-style-type: none"> • Directive 2002/32/EG on undesirable substances in animal feed; • GMP+FSA; Appendix 1 (Product standards, including residue standards) • Regulation 396/2005 on maximum residue levels of pesticides in or on food or feed.

Product Data Sheet – Animal Feeds

	<ul style="list-style-type: none"> CO₂ is evolved as a result of the respiratory activity of the cargo. Because of the possible oxygen shortage, the hold must be ventilated and a gas measurement performed before access to the hold is permitted.
Specific analysis and standard tolerances	
Salmonella	Absent in 25g
Appearance	Yellow/orange ground meal.
Country of origin	EU, Ukrainian & Black sea origin.
Health Information	
Inhalation	When handled, maize meal can give off dust. Prolonged inhalation of excessive amounts of nuisance dusts may affect respiratory system. Prolonged or repeated exposure may result in lung damage.
Ingestion	No known hazards.
Eye Contact	Exposure may cause slight irritation.
Skin Contact	Dust can cause irritation or sensitivity to skin.
Toxicological Information	Non-toxic product.
Occupational exposure limits	Not Set.
Emergency first aid procedures	
Ingestion	Do not induce vomiting. Give person water to drink. If gastro-intestinal symptoms develop seek medical help.
Eye Contact	In the event of eye contact irrigate with water for at least 15 minutes. Exposure may result in mild irritation. Seek medical attention if irritation Occurs.
Skin Contact	Wash effected area with soap and water. Seek medical attention if irritation develops.
Inhalation	Remove person to fresh air. Seek medical attention if symptoms develop.
Physical properties	
Physical state	Solid
Appearance	Yellow/Orange ground meal
Odour	Maize has a slight, pleasant odour. Excessive moist maize has a sour odour.
Flammability limits	Catches fire briefly and extinguishes rapidly.
Fire & Explosion hazard	
Flash point	>60°C
Flammability	Due to its oil content and fine particle size ground maize, especially freshly harvested maize, has a strong tendency to become rancid and undergo self-heating creating a higher risk of self-combustion. If the temperatures measured at the cargo rise to > 40°C, action must immediately be taken to reduce the temperature. If the temperatures exceed 60°C, an increased risk of fire must be assumed, and appropriate action taken. Damage caused by self-heating results in considerable depreciation
Extinguishing media	Carbon dioxide or foam
Special firefighting procedures & precautions	
Combustible when subjected to heat. Suitable extinguishing agents are dry agent, carbon dioxide and water spray. Fire fighters should use self-contained breathing apparatus to avoid exposure to smoke and fumes.	
Adequate extraction facilities should be provided in all areas subject to dust.	
Reactivity	
Stability	Stable
Hazardous Polymerization	Will not occur.
Material to avoid	Moisture- Care should be taken to ensure that the surfaces are not cooled too much, to avoid the formation of damp boundary layers beneath the cargo surface.
Hazardous decomposition products	Combustion produces CO ₂ , CO & thick smoke.
Personal protection / Exposure control	
Respiratory Protection	Always ensure the work area has adequate ventilation. In case of dust formation, wear appropriate respiratory protective equipment determined and fitted by an expert.
Skin protection	Gloves and overalls should be worn when handling.
Eye Protection	Always wear approved safety glasses when working. Full face protective shields can be worn to avoid contact with face. Wash stations should be provided.
Footwear	Appropriate footwear as specified by workplace requirements.
Environmental Protection

Product Data Sheet – Animal Feeds

Environmental precautions	This product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment. Avoid excessive dust emissions.
Spill or leak precautions	No special precautions. Normal sweeping of small spillages and collection is appropriate. For larger spillages mechanical scooping may be necessary (use only diesel vehicles).
Waste disposal	Dispose spilled or contaminated material to landfill. Do not release into drains or other measures.
This is for information purposes only and is not contractual.
