| | Product Specifications | |
| Feed Stuff | Faba Bean hulls | |
| Trading Name | Beans Skins, Bean Hulls | |
| Product Description | Beans Skins are produced by mechanically splitting dry Beans from assured sources using heavy rotating plates and separated out of the process by aspiration, sieving and colour sorting | |
| Specification* | Moisture-~8-15% (These Values are not contractual) | |
| General Use | By-products of dehulling the Faba bean Faba bean is a major legume seed consumed by humans | |
| | worldwide. The seeds of some varieties are an important livestock feed. Faba bean is also grown for | |
| | fodder. | |
| Packaging & | Bulk – Stacked container | |
| Transport | | |
| Labelling | According to EU legislation 767/2009 | |
| Storage | Commodities should be stored at an ambient –cool temperature in dry flat stores (TASCC approved) . | |
| | No heat should be applied to the products as it can potentially self-ignite given combustible | |
| | conditions. | |
| Legal Demands | The products comply with legal requirements & legislation. The most significant elements of which | |
| | are: | |
| | • Regulation 183/2005 on Feed hygiene. | |
| | • Regulation 767/2009 on placing on the market and the use of feed. | |
| | Feeding Stuffs Regulations 2000. | |
| Undesirable | The maximum determined contents for undesirable substances in feedstuff, such as established in: | |
| substances | Directive 2002/32/EG on undesirable substances in animal feed. | |
| | Pesticides – Regulation 396/2005 Participation 4000 (2000) Participa | |
| | Regulation 1829/2003 on genetically modified food & feed | |
| Calmanalla | Specific analysis and standard tolerances | |
| Salmonella | Absent in 25g | |
| Appearance | A mid brown coarse product made up of the Skins of Dry Beans | |
| Country of origin EU | | |
| lubalatian | Health Information | |
| Inhalation | Classified as a dust nuisance only. Inhalation may aggravate those with pre-existing conditions. | |
| Ingestion | Non-hazardous food product. May cause an allergic response with sensitive individuals. | |
| Eye Contact | Can cause discomfort | |
| Skin Contact | In certain individuals subject to Malady, dermatitis may occur and hence protective gloves would be | |
| Tovicological | advisable. The material is classified as non-toxic but as dust nuisance only. It is not a corrosive. Not available. | |
| Toxicological Information | INUL AVAIIADIE. | |
| | None available | |
| Occupational exposure limits | I NUITE AVAITABLE | |
| exposure illilits | Emergency first aid procedures | |
| Ingestion Non-toxic – dust masks should be worn. | | |
| Ingestion Eve Contact | In the event of eye contact irrigate with water for at least 15 minutes. Exposure may result in mild | |
| Eye Contact | | |
| Skin Contact | irritation. Seek medical attention if symptoms persist. Wash contact areas with soap and water. Get medical attention promptly if symptoms occur | |
| Inhalation | Remove person to fresh air. Seek medical attention if symptoms persist. | |
| | | |
| Physical properties Physical state Solid | | |
| Physical state | A mid brown coarse product made up of the Skins of Dry Beans | |
| Appearance | A find brown coarse product made up of the skins of bry Beans | |

Product data Sheet Animal Feeds

| K7-04A | Product data Sneet Animal Feeds ABaywa Company | |
|---|---|--|
| Odour | None | |
| Flammability limits | Not Known | |
| Fire & Explosion hazard | | |
| Flammability | . Temperature monitoring required frequently. Catches fire briefly and extinguishes rapidly | |
| Flash Point | Ignition temperature 400°C | |
| Extinguishing media | Foam, dry chemical, carbon dioxide – flames should be smothered | |
| Explosion Class | ST 1 | |
| Special firefighting procedures & precautions | | |
| Combustible when subjected to heat. Suitable extinguishing agents are dry agent, carbon dioxide and foam. | | |
| Fire fighters should use self-contained breathing apparatus to avoid exposure to smoke and fumes. | | |
| Adequate extraction | facilities should be provided in all areas subject to dust. | |
| Water must not be used as increases the potential for heating and self-combustion | | |
| Reactivity | | |
| Stability | Stable | |
| Hazardous | Not known | |
| Polymerization | | |
| Materials to Avoid | Strong oxidizing agents, moisture and heat sources. | |
| Hazardous | Combustion produces CO2 & CO which can be toxic. | |
| decomposition | | |
| products | | |
| Personal protection / Exposure control | | |
| Respiratory | Always ensure the work area has adequate ventilation. In case of dust formation, wear appropriate | |
| Protection | respiratory protective equipment determined and fitted by an expert. dust masks should be worn. | |
| Skin protection | Gloves and overalls should be worn when handling. | |
| Eye Protection | Always wear approved safety glasses when working. Full face protective shields can be worn to avoid | |
| | contact with face. Wash stations should be provided. | |
| Footwear | Appropriate footwear as specified by workplace requirements. | |
| Environmental Protection | | |
| Environmental | Avoid discharge into sewage systems, water courses or onto the ground. Avoid excessive dust | |
| precautions | emissions | |
| Spill or leak | Clean up spilled material using broom or other measure. | |
| precautions | | |
| Waste disposal | Dispose spilled or contaminated material to landfill. Do not release into drains or other measures. | |
| | This is for information purposes only and is not contractual | |
